ENERGY MANAGEMENT POLICY

As a responsible corporate citizen, we remain committed to continual improvement in the operations of manufacture of fertilizers and chemicals with the aim of achieving energy conservation.

To achieve the above, we confirm we shall strive to:

- a. optimize the consumption of resources viz., raw material, utilities, fuel and electrical energy.
- b. improve capacity utilization and on-stream hours through reliability centred maintenance practices.
- c. periodically review the specific energy consumption norms by benchmarking.
- d. carry out energy audits for identifying areas for improvement.
- e. implement energy conservation activities and to adopt energy efficient technologies.
- f. use alternate and renewable energy sources.
- g. create awareness amongst employees regarding energy conservation.
